

Master Bedroom

This Master Bedroom just didn't flow. When a room isn't right, you feel it every time you walk in.

Challenge: With valuable wall space taken up by windows and closets (both good things!), it was difficult to arrange furniture so that closet doors weren't blocked. There was no budget for new furnishings or accessories.

Solution: We made the unusual decision to place the bed in front of an unused sliding glass door, thereby freeing up wall space for the dresser.

Option: One. Monarch Interior Solutions brought in a few paintings, a rug, and a chair from other rooms. Nothing was spent to transform this room and the client loves it!
